\*Banked capacity is the difference between the highest lawful levy allowed for the district and the actual amount levied in the previous year. If the district wants to use banked capacity, the resolution must authorize a large enough increase to allow the district to levy at their highest lawful levy.

Additional amounts may be collected for new construction, state assessed increases, and refunds. These amounts do not need to be shown on the ordinance/resolution.

The district can authorize any amount of increase, and the actual levy amount approved will be limited by the amount authorized, but it is also subject to other levy limits.

} The Certification amounts are to be determined by the Board. The amounts shown here are possible amounts based on estimated new construction and state assessed amounts; this year's final new construction and state assessed will not be known until mid-October.

The regular levy amount shown on the certification includes new construction and state assessed increases, unlike the ordinance/resolution calculations. Because the amounts stated on the certification limit the amount that can be levied, the district should estimate these numbers high if the district wants to levy the maximum amount allowed.
